

Novatork is a relatively new manufacturer of torque products. Together with American consultants Novatork, have designed a range of torque wrenches well suited for the industrial market. With all metal design this warrants for long and durable use. Novatork have in their development focused on two main factors, quality and wide range. With 58 models covering the range from 2-3000Nm, with or with scale and with ratchet or for interchangeable heads most users will find what they need.

In order to ensure the quality of the torque wrenches Fambra supply to our customers each torque wrench is calibrated prior to shipment. This gives you, as customer, the security of the product supplied and always a new calibration certificate.

DSM-Series A dial indicating torque wrench with slave pointer. Easy to use - 27 models up to 2000 Nm.

- Accuracy +/- 4%.
- Easy to read scale with slave pointer.
- Supplied in plastic box
- Meets or exceeds demands in ISO 6789:2003
